-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1 and 4-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kerch et al. (4,762,124). Kerch expressly teaches packaging to hold large quantities of liquid. The packaging comprises two separable, leakproof pieces of material 21 and 23. An applicator is fixed to an inside face of material 21, the applicator comprising a flexible and porous material (permeable membrane 22) that is fixed to the inside face of material 21 and a material (absorbent pad 20) in which the liquid is distributed. This absorbent pad 20 is housed between the piece of flexible and porous material and the inside face of leakproof material 21, as recited in claim 1. Thus, and as can also be readily appreciated, the piece of flexible and porous material and the inside face together form a closed pouch that holds the liquid therein, such that a user can apply the liquid through the flexible and porous material without touching it, as also recited in claim 1. For the noted reasons, at least claim 1 would appear to be anticipated by Kerch et al.

Other elements of the rejected claims can also be seen in Kerch. Additionally, should any element of the claims that is known per se in the art, be later deemed to be missing from Kerch, the examiner considers that it would have

been obvious in view of the teaching of Kerch, to provide the apparatus therein with the missing element or feature, for the purpose of improving its performance.

3. Claim 13 is allowed since the specific combination recited therein is believed to be novel and unobvious..

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (571)272-4418. The examiner can normally be reached on Monday through Friday 8.30AM-5.00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571)272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
